Security Features: MicroPrint™, Security Sensitive Paper, Security Screen

MicroPrint™ is a security feature that is printed in the top left corner of the document. It is a series of tiny characters that are difficult to reproduce with a copier or scanner.

Security Sensitive Paper is a type of paper that is designed to be difficult to copy or scan. It has a special texture and color that makes it difficult to reproduce with a copier or scanner.

Security Screen is a feature that is designed to prevent the document from being scanned or copied. It is a series of tiny characters that are printed in the top left corner of the document.
