

Consider unwinding your cad trade. See Nav's comments below, but essentially higher energy prices and outflows of short CAD are expected to provide support/remove downward pressure on the currency.

You paid \$109k for your reverse knock-in call spread. Indicative unwind level today is \$136k (source: DB WM FX Tading, 3/5/14). Consider taking the \$27k gain.

Subject: usdcad update for JE [I]  
Classification: For internal use only

three points

1. commodity px are much higher - bullish cad
  2. CAD 2y swap rate higher (not lower as i had expected) vs US rates compared to 2mths ago - bullish cad
- (Embedded image moved to file: pic08004.gif)

canada still has v vulnerable housing sector and several high profile clients have been exiting canadian risk (pimco ed devlin in ft last week) but nevertheless given 1 and 2 above im less bearish cad vs usd than 2mths ago when JE entered the trade.

so given 1 and 2 im surprised usdcad hasnt moved lower - i dont have a view on usdcad here and therefore dont like the trade anymore

Nav
