Your brokerage account record has been reviewed and signed by a registered representative of our firm and approved by an authorized principal.

ACCOUNT INFORMATION DEFINITIONS

- Capital Preservation - For clients looking to preserve their principal, but who are comfortable with a small amount of volatility in exchange for the possibility of returns. Clients with this objective are interested in liquid, lower risk investments, a portion of which may have short terms and stable values, resulting in smaller returns than some of the other major asset classes.
- Income Generation - For clients seeking a balanced approach to growth through a combination of products with differing levels of risk and return. Clients with this objective expect the volatility in their account to be more than capital preservation but less than capital appreciation with the intent of earning income.
- Capital Appreciation - For clients who are looking for a higher rate of return and are, as a result, willing to take on higher risk.
- Speculation - Includes the most aggressive investments. This level of risk tolerance is for clients willing to invest all or a portion of their account in products that may generate higher returns but may lose all or part of the investment.
- Total net worth - Total assets minus total liabilities (excluding primary residence).
- Liquid net worth - Net assets that can quickly and easily be converted to cash without experiencing significant loss in value from, for example, the lack of a ready market, or incurring significant costs or penalties. (Include 50% of IRAs and 401(k)s.)
