I yLottery

09:26:14 am

algorithms give you no info into who will win the lottery. and the winners of the second third and fourth lottery, , they might be related they might not. some one will win. .

09:56:52 am

J

Joscha Bach

Algorithms (computable functions) are the only thing that can tell you about the future.

08:20:11 pm

(Unless you are Julia Mossbridge, in which case you can just remember the future, because some entropy runs backwards if you p-hack enough)

08:21:01 pm

JB

jeevacation

it cant tell you who will win the lottery or the equivalent regarding mutations

08:21:14 pm

J

Joscha Bach

Only Wolfram can do that

08:21:29 pm

Once he has found the generator function for the universe and figured out where exactly we are right now.

08:21:49 pm

JB

jeevacation

algorithms rely on sampling. sampling the group of contestants tells you nothing about who will win

08:21:54 pm

it is the equivalent of division by zero.

08:22:07 pm

the generator function does not apply at the limits.

08:22:23 pm

only the approach to the limit

08:22:30 pm

missing the essence

08:22:35 pm

J

Joscha Bach

To figure out who wins the lottery you have to sample and model the source of pseudorandomness. Lotteries working by making that so hard that it becomes infeasible

08:23:31 pm

JB

jeevacation

that doesn't tell you anything regarding one lottery only a population of lotteries

08:24:28 pm

08:26:18 pm

JB

jeevacation

only a look back

08:29:39 pm

J

Joscha Bach

(I know)

08:32:52 pm

jeevacation

the soul is the dark matter of the brain

08:36:10 pm

Joscha Bach

the soul is the difference between you and a perfectly rational agent with the same resources

08:36:32 pm

jeevacation

agreed

08:36:51 pm

Joscha Bach

for most Jews it entails a world model deformation that points them towards transcendence

08:37:13 pm

an intuition that we ought to play a game of infinite length

08:37:35 pm

jeevacation

what happens to your algorithm when $(1/0)$ raised to the 0 power

08:37:41 pm

you could argue the answer is 1

08:38:12 pm

Joscha Bach

it all depends on how you define the rules of your Glasperlenspiel

08:39:48 pm

jeevacation

skype?

08:40:05 pm

its like b sharp or c flat.

08:40:13 pm

Joscha Bach

5 minutes

08:40:29 pm

jeevacation

ok

08:40:31 pm
