Very very spooky stuff I'm learning.  
I don't usually get goosebumps reading about science.  
Why hasn't anyone else thought of all this yet?  
I've got 45 or so papers for you. This is really exciting.

Need to sit for an hour or so in person to talk about what we can learn.

05:07:32 pm

Humans do have flowers

Men have erections and women have vaginas

05:07:43 pm

Flowers are the attractive or sexual part that propagates the species

05:09:02 pm

And the other degenerative protein aggregations

05:09:14 pm

Gonna read more but I think some folks are close and they don't even know it

05:09:34 pm

We have to change the way we think / dogma --- you are right it's a system and not an action

05:11:02 pm

It's like stunted kids in Africa - they could grow tall but no nutrients means short

05:11:26 pm

[REDACTED]

Or if you feed kids tacos and Doritos ...

05:11:38 pm

[REDACTED]

Inability to make Sugar causes animals

05:11:53 pm

[REDACTED]

There's a crazy crazy part of the root system

05:11:54 pm

05:12:12 pm

[REDACTED]

Fucked up it gave me chills

05:12:50 pm

Repeated in nearly 20 experiments bc no one could believe it

05:13:05 pm

Ok I am going to read some more and I'm saving everything for you and making notes -  
-// we are on to something

05:13:45 pm

But the answer I think we know

05:13:55 pm

I'm gonna let you think about it and see if we come to the same conclusion
