[Redacted]

Should I see if Ed can meet on Monday in Boston? Might be able to get there ....

06:00:44 pm

[Redacted]

when ever good for you ok

06:01:05 pm

[Redacted]

Should I email and ask him? Monday would be great

06:53:11 pm

[Redacted]

Yes

07:51:53 pm

[Redacted]

Hard thought challenge question for you

02:49:02 am

In your brain

Trauma or acute pathology in one place makes trouble in another

02:49:30 am

So a hemorrhage in the anterior Cortex causes vasospasm far away like occipital

02:50:02 am

It usually relates to subarachnoid hemorrhage and we just can't figure out (for hundreds of years) why that happens

Baffling

02:50:35 am

Roots

04:12:30 am

It's not magic - needs a real explan

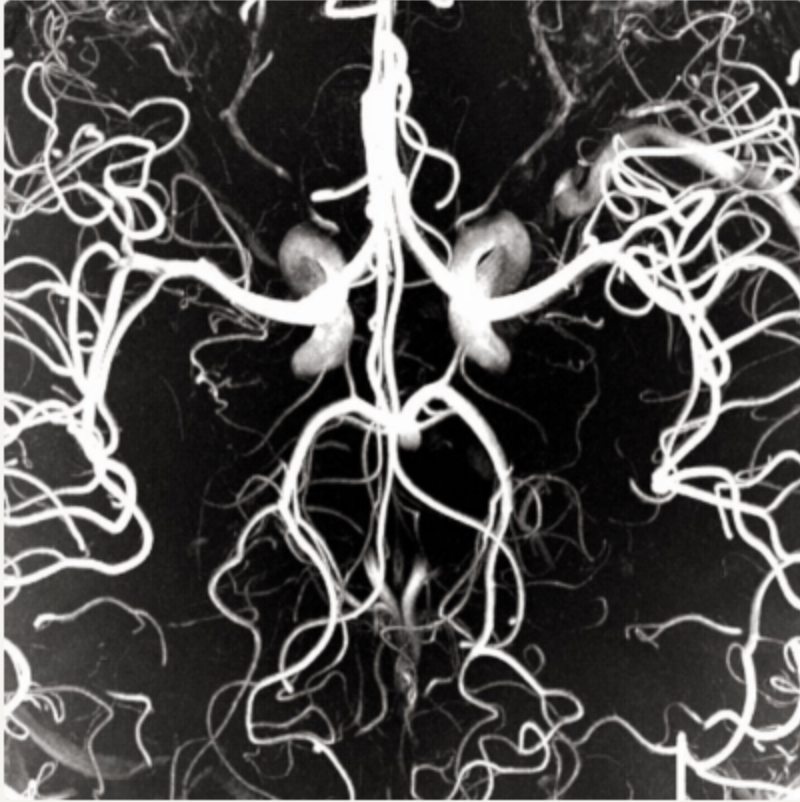

04:13:15 am

Parietal bleed frontal vasospasm

04:13:34 am

But yes plants can tell us

04:13:49 am

04:14:01 am

So beautiful - did this angio today

04:14:16 am

doesn't it look like roots

12:10:27 pm

its a damage signal like insect on the flower. be prepared

12:11:09 pm

I guess hard part to explain is the mechanism

12:36:26 pm

No clear link or signaling pathway

12:37:08 pm

We treat very poorly w calcium channel blockers

12:37:23 pm

Seems like insect on a flower would be more like regular stuff w a sensory system

12:41:05 pm

a system disrupter, if it is electrical field it would mediate change for example

12:41:50 pm

Never know which vessel will spasm

12:43:51 pm

The blood vessels totally look like roots

12:46:05 pm

Not sure what to make of the cortex though.

Plants do almost everything we do except move and have no Cortex

12:46:57 pm

they get us to move them

12:47:23 pm

Haha

12:48:05 pm

With leaves like pigmented epithelium and roots like the nervous system

12:49:34 pm

And no mesoderm or endoderm bc they are useless unless you need to move and mate

12:50:05 pm

2017/04/29

  
<http://www.fiercebiotech.com/r-d/teva-pharma-ceo-bets-on-alzheimer-s-cns-research-amid-major-reboot>

12:49:37 pm

 and one of my peers heads neuro development for teva. Says that they are looking very hard for any new ideas and mechanisms but nothing out there.

12:49:37 pm

  
Have him sign a nda

12:50:28 pm

Didn't tell him a word was just listening to him

12:50:43 pm

Everyone around here wants to talk to me about endovascular - just bc it's new to many of these guys

12:51:56 pm

But my point is that if we had a good idea, teva would certainly listen and they are all Jewish which means you would have to speak w them since I always get outplayed

12:53:07 pm

Varsity

12:53:12 pm

Hilarious saga continues w Steve and his mom and sister over there fraud and sneakily getting extra mortgages on that house, etc .... you will laugh at this

12:53:54 pm

Steve says that the only reason he needs to keep in basic contact w his sister is in case he needs a kidney

12:54:20 pm

Who thinks of that?

12:54:24 pm

He says he would have to buy it from her.

12:54:34 pm

So funny

12:54:38 pm
