Plants plants plants
How are you?

08:37:46 pm

08:37:46 pm

2017/05/30

[REDACTED]
great
01:13:50 am

2017/06/01

[REDACTED]
Are you still thinking about plants or moved on?
04:22:08 pm

[REDACTED]
All over it
04:24:00 pm

[REDACTED]
WOWWWWWW
Any news or actions to take
04:24:11 pm

I've got more too / thinking
04:24:17 pm

Thinking about pathways in Plants and all ways they move things in/out/around ---
04:25:03 pm

Made me realize we are underexploiting nerves and that's the way in

Axonal transport
04:25:32 pm

But I think I figured it out
07:33:57 pm

And it seems to be a similar deal for Alzheimer Parkinson and a few others - exactly the same as in plants

Know why it happens
Know why our treatments don't work
Know how to exploit

Just not sure with what substances yet

07:35:16 pm

Going to take this wknd to write it up or do my best

Not sure if I should talk to billg about it or not

07:35:51 pm

But it is totally mind bogglingly simple

07:36:16 pm

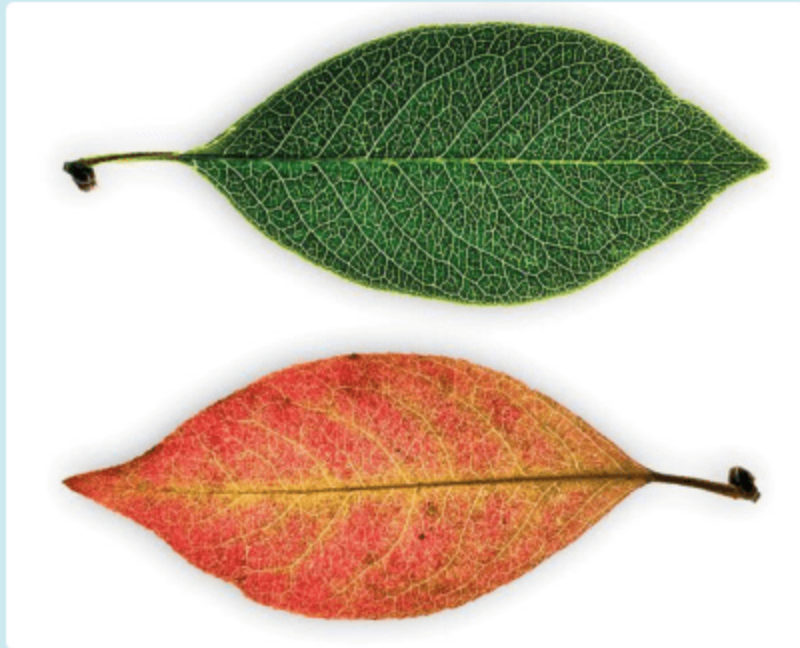

2017/06/02

did you meet caleb? are the amoloids merely a marker , why don't bats get cancer.? oxygen radicals. . how is oxygen created in plants. are there free radicals?

11:06:13 am

<http://www.popsoci.com/article/science/ask-anything-do-plants-get-cancer>

11:10:56 am

they get it but fix it in place. . i like the idea. don't attack it. wall it off and fix it in place, . also distribute vital processes . much more evolved.\

11:10:57 am

11:12:23 am

oo

2017/06/03

Not Caleb yet - will see him and boyden together soon when they are both in town

03:39:02 pm

So think through ... humans if they couldn't move which pathways would they use to get stuff in

Mood vessels
Air passages
Nerve pathways

03:39:51 pm

Bingo

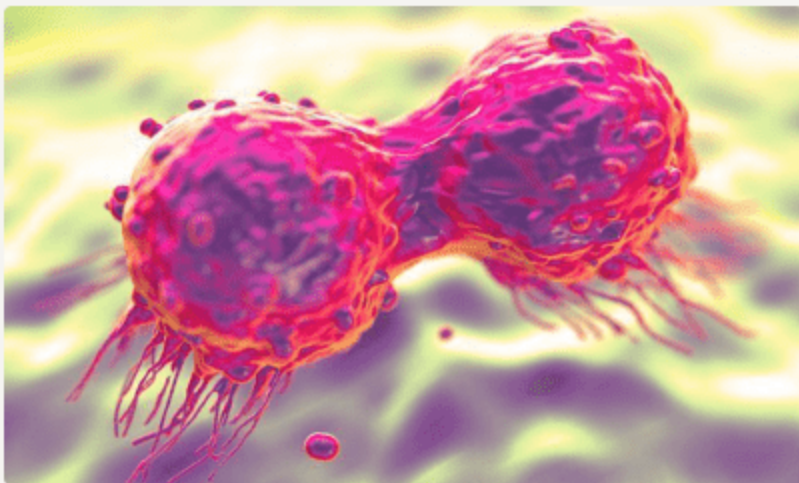

03:39:56 pm

07:14:58 pm
