Still a lot of momentum and support to "start something" related to health and data.

Disrupting health in a big way is interesting bc there is delivery of care and there is data. Unlike others (uber, airbnb) there isn't excess capacity.

The disruption i think is in the price/cost. All the data is public and knowable (requires data crunchers). So is the certification data

12:46:18 pm

So in the same way I networked all the bank offices and all the transaction data around operational that could also be done for the USA health care system.

The companies doing it now only do for the hospitals themselves - no one does for consumer and that's what's missing.

12:47:49 pm

is our focus medicine the world or your financial security

12:48:03 pm

I'm trying to find ways to make a lot of money

12:48:15 pm

One way is to start up a company

12:48:21 pm

I'm explaining to you where my skills and experiences could possibly do something creative in the for profit space

12:48:49 pm

My focus is ALWAYS about how I can make money

12:49:03 pm

So it seems like I could work for someone, work for myself, invent something, become a media personality, etc - but don't know

12:51:30 pm

Will be in Seattle later this week. Bg asked to see me for a bit on Thursday. If there's anything I should ask or say pls let me know. He's always said let him know how to help. I've never asked for anything.
