[Redacted]

Maybe better to think of the future of disease
02:17:31 pm

[Redacted]

Harnessing the food parts of cancer
02:18:22 pm

[Redacted]

Food?
02:24:12 pm

[Redacted]

Good
02:24:35 pm

[Redacted]

There are no good parts of Xander
02:24:42 pm

Cancer
02:24:44 pm

[Redacted]

Survival
02:24:51 pm

[REDACTED]

That makes no sense

02:25:15 pm

And cancer probably isn't even a real thing

02:25:28 pm

Like if a different species from mars looked at all the things we call cancer they wouldn't call it cancer

02:25:50 pm

What causes unchecked growth of different biological cells

02:26:23 pm

[REDACTED]

the biggest advance would be to decrypt the bio language. giving us the chance to write bio code and fix problems

02:28:15 pm

[REDACTED]

I disagree

02:50:53 pm

The bio code is like learning an alphabet it's not a language or a culture

02:51:25 pm

Temperature pathogens food etc have a way greater effect than any code stuff

02:55:39 pm

[REDACTED]

Communication is modulated protein structure is a limited grammar

02:59:07 pm

[Redacted]

Naah
03:07:18 pm

[Redacted]

Ok
03:07:42 pm

Would you prefer the term signals
03:08:15 pm

Not accurate but more feminine
03:08:32 pm

[Redacted]

Disagree
03:08:33 pm

I think about it very differently
03:08:43 pm

If it was just protein structure and "code" we would have cracked one thing
03:08:56 pm

It isn't
03:08:58 pm

It's more like soup than steak
03:09:04 pm

Great you have a carrot. But we are in soup.
03:09:18 pm

Neural transmission is all electricity and zero code
03:09:51 pm

Thresholds

03:09:54 pm

Temperature acidity pressure etc

03:10:10 pm

The code and language is really far downstream and not so interesting

03:10:38 pm

Soups under certain conditions behave predictably- electricity is a signal frequency a code

03:10:41 pm

We know everything about the mouse genome and we haven't fixed a single mouse

03:11:02 pm

You no nothing except letters - no meaning it's silly

03:11:54 pm

Permutations and combination s remain opaque

03:12:37 pm

Language is one of the least useful and interesting parts of human existence

03:12:56 pm

Signals I agree but not as cracking a code

03:13:17 pm

Physics yes

03:13:26 pm

Mostly all physics

03:13:38 pm

This neural lace stuff is making me think a lot

03:13:51 pm

We aren't making progress bc we are wrong

03:13:59 pm

Focused on not RIGHT stuff

03:14:09 pm

Spoken language ? Yes / we need to talk you are not thinking

03:14:25 pm

You are looking at the ink on the page . Says nothin about the story

03:15:24 pm
