I did give it a halfhearted try, but the site was confused by the same file name for all of them so I figured I would wait. Path of least resistance and all.

Whatever you want to do is fine... If you're able to submit them all and have the time to do so, then go ahead and get things rolling with all, but if you want to wait then I understand that too.. - how's that for a "non answer" - lol

I have multiple manifest.plist files from encrypted IOS backups that I got off of Jeffrey Epstein's iMac. I have submitted 1 via the web site. The way people usually work, if you crack that one, it will probably be the same as the others. Is it worth submitting the other 3 I have, or just wait and see what happens with the one? Let me know. Thanks.
