As jee suspected nuclear was a false positive. I met with Doctor shimony who examined me and then performed an echo. He did not seemed worried at all and then sent me to Doctor Hecht for a ct angiogram which showed a small amount of plaque but not enough to be concerned about. I will begin Lipitor and baby aspirin. I was cleared to resume activities and obviously no angiogram necessary. Doctor shimony is a real special man and gave us first class treatment. Thanks for all your help.

Rich
