- if he is willing and they are available, I would also like to review the reports/results of his electrophysiological studies, namely Nerve Conduction Studies (Electroneurography), needle EMG (Electromyography), and SSEPs (Somatosensory Evoked Potentials)

- I'm also attaching a PDF of a manuscript-in-progress about the neural coding of tonal consonance and dissonance by auditory-nerve fibers, which we discussed over the phone Sunday - the Figures at the end tell the computational part of the results I tried to relate verbally - the equations and graphs communicate so much better!

- my mailing address for the MR images:

Dr Mark Tramo
The Institute for Music & Brain Science
2220 Lynn Road, Suite 300
Thousand Oaks, CA 91360
tel [REDACTED]
fax [REDACTED]

-

Best,
Mark
