---

HI Darren...attached is my best estimate given what information I have saved for Jeffrey's PB days in 2015 and 2014 (it is more than you thought! around 77 for 2015 and around 66 for 2014). It should be accurate accept I don't have information on June 2015 (I do know he went to PB for a day or so) and my info for April 2014 could be off...I'm sure Bebe or Larry could look at flight logs and figure out as well if need be.
