Fair point — I hadn't considered that.

Thanks for plugging it in for me. I'll check it on my next visit, if he hasn't given feedback before.

James,
I did not try it. Don't know if I'm allowed to touch his computer

Forgive the obvious question, but are the speakers working on the iMac now?

James,
I attached the adapter to the cable and plugged it in the back of the iMac.

Hi Rich,

Can you order this by 2PM for delivery to 71st St tomorrow?

<http://www.amazon.com/Conwork-2-Pack-Toslink-Connector-Adapter/dp/B016466XPO/>

If you don't make the 2PM deadline, this will work too:

<http://www.amazon.com/Tgomtech-Toslink-Mini-Plug-Adapter/dp/B00J0A27AC/>

They're both really cheap adapters to connect the iMac to the Logitech speakers on the desk here. Somehow the existing adapter got broken.

Merwin can attach it to the cable and plug it in so it's working when JEE arrives tomorrow.

Thx.
